NESS Education Partnership with Government/Industry (for Profit or Non-profit)

Mission and Value Statement

The primary mission of NESS is to ensure development, discussion, and dissemination of sound, state-of-the-art practices in statistics and data science.

Through NESS education outreach, people can acquire skills and insight that are crucial in today’s data-centric workplace.

Content providers from NESS can establish longer-term research or consulting collaborations with government or business and industry to develop consulting or research.

Academics can also gain information into real-world problems which may be useful for their research and/or pedagogy.

NESS can provide more educational focused, more ongoing, and more partnership-based collaboration with industry and government, and therefore address a different level of interaction than the usual customer-vendor model.

Given the concentration of top academic institutions in NE, NESS is confident of providing content in the top emerging areas of statistics and data science.
NESS Education Partnership with Educational institutions (high schools, community colleges, liberal arts programs)

Mission and Value Statement

The primary mission of NESS is to ensure development, discussion, and dissemination of sound, state-of-the-art practices in statistics and data science, and encourage pedagogy leading to enhancement in these areas.

Through NESS education outreach, both instructors and students can acquire skills and insight that are crucial in today’s undergraduate/graduate school curricula as well as in an increasingly data centric workplace.

Include a strong emphasis on building pipeline for statistics and data science in general, through site visits, workshops, webinars, etc.

Encourage more project work, poster presentations, etc.
